1. The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

The oath or declaration is defective because:

It does not identify the mailing address of each inventor. A mailing address is an address at which an inventor customarily receives his or her mail and may be either a home or business address. The mailing address should include the ZIP Code designation. The mailing address may be provided in an application data sheet or a supplemental oath or declaration. See 37 CFR 1.63(c) and 37 CFR 1.76.

It does not identify the city and either state or foreign country of residence of each inventor. The residence information may be provided on either an application data sheet or supplemental oath or declaration.

It does not identify the citizenship of each inventor.

- 2. New corrected drawings in compliance with 37 CFR 1.121(d) are required in this application because the supplied drawings are informal in nature. Applicant is advised to employ the services of a competent patent draftsperson outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.
- 3. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the manually operated force generating unit (claims 5 and 14) and the hydraulic ram device (claims 8 and 17)

must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Page 3

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filling date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

- 4. The following is a quotation of the second paragraph of 35 U.S.C. 112:
 The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 5. Claims 12-19 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 12, line 11, "said force generating unit" lacks antecedent basis.

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

7. Claims 1-4, 6, 9, 10, 12, 13, 15, and 18 are rejected under 35 U.S.C. 102(b) as being anticipated by Evans (US 5,420,772).

Evans shows an object positioning device which could be used without modification for moving a battery relative to a shelf unit, inasmuch as neither a battery nor a shelf unit are positively recited structural limitations, comprising (fig. 4 embodiment) rotary motion generating unit 170, linear motion translating unit 178, object engaging structure 26 (see fig. 1), and rigid frame 142, which is "adapted to cooperate with a shelf unit" as broadly claimed, wherein the object is moved in a vertical axis in response to the force of the motion translating unit.

Re claim 3, note force generating unit 164 integral with the motion generating unit.

Re claim 4, note the embodiment of fig. 1 in which the force generating unit 94 is separate from and configured for connection with the motion generating unit 60.

8. Claims 1-3, 5, and 12-14 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Orawiec (US 4,126,232).

Application/Control Number: 10/723,844

Art Unit: 3652

9. Claims 1-3, 5, 9, 10, 12-14, and 18 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Brown (US 3,652,057).

Page 5

10. Claims 1, 3, 5, 8, 11, 12, 14, 17, and 19 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Bontrager (US 4,030,705).

Re claims 11 and 19, the frame is "telescopically disposed" (col. 2, line 39) and could be used to move the lifted article horizontally. Note that to anticipate an apparatus claim, a reference need only show the positively recited structural elements and be capable of performing the functional recitations.

- 11. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 12. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to

consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

13. Claims 6-7 and 15-16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bontrager.

Although manually powered, Bontrager discloses that the device may alternatively use a power driven motor (col. 3, lines 9-11). Although not explicitly stated, it is considered obvious, if not inherent, that such a motor would be electric.

However, no indication is given that the motor would be battery powered.

Nevertheless, it would have been obvious for one of ordinary skill in the art at the time of the invention to have modified the apparatus of Bontrager such that the motor would be battery powered, for example by the battery of the vehicle, as this would simply be a well known design expediency, the use of which would require no undue experimentation and produce no unexpected results.

- 14. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
- 15. Any inquiry concerning this communication or earlier communications from the examiner should be directed to James Keenan whose telephone number is 571-272-6925. The examiner can normally be reached on (schedule varies).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Eillen Lillis can be reached on 571-272-6928. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
